

Modeling Tool Range

Handle A,

Handle B,

Handle C,

Monumental Handle MLT 6",

Monumental Handle MLT 8",

The brightly colored anodized handles help you to quickly identify tools easily. Each handle is approximately 6" in length and comes with an allen wrench for easy loop change.

The wire loops on the following pages interchange easily by simply loosening the set screw with the allen wrench (provided), slide the wire loop in the handle and tighten the set screw.

Use the handle and loop that fit your project.

Small Loops

Small loops are made of round, tempered music wire, which is both strong and flexible.

Small loops can be used with E handles

Medium Loops

Medium loops are constructed out of half round tempered music wire, which is sharp, strong, and flexible.

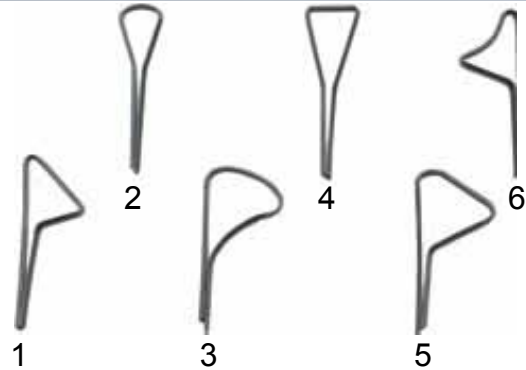

Medium loops can be used with handles B, C, and E

Trimming Loops

Trimming loops are made of flat, stainless steel wire. Very sharp; ideal for firm clay and ceramics.

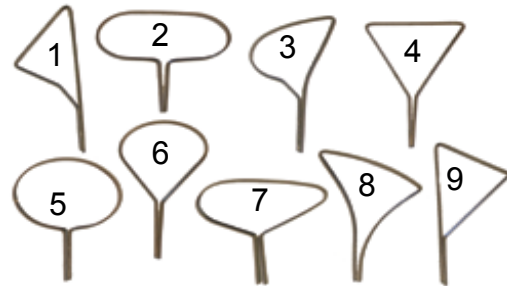

Trimming loops can be used with handles A, B, and C

Cutting Loops

Cutting Loops are Sharp, flat stainless steel wire. Cutting loops are ideal for firmer clays.

Cutting loops can be used with handles A, B, and C

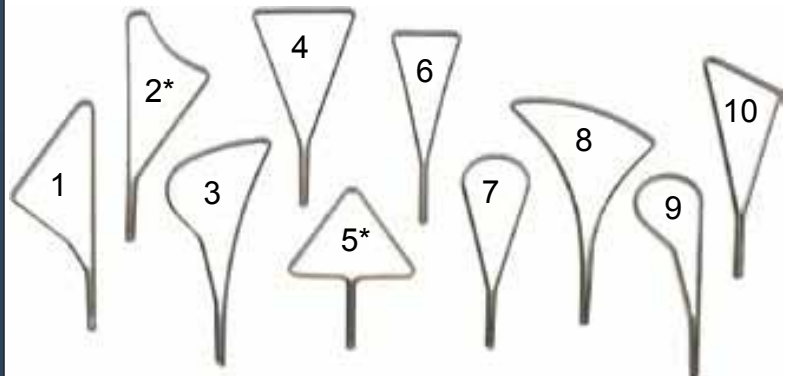

Large Loops

Large Loops are made of half round stainless steel wire that is quite strong.

Large loops can be used with handles A, B, and C

**Not all available with serrated edge*

Monumental Loops

Monumental loops are very sharp. Great for clay as well as masonry.

Monumental loops can only be used with Monumental Handles
